Sooner or later the quantum mechanics will reach the point, at which it needs to consider the influence of our Conscious to explain the observed physical reality. Niels Bohr (said more than 100 years ago)

Editorial

In my article: "Why Should Our Science Accept the Fact that We Have a Quantum Computer in our Subconscious?" I claim that we have a Quantum Computer in our Subconscious, of which we are not consciously aware [1]. This claim is based on the fact that hypnotists, who put the Conscious to sleep to access the Subconscious, found with surprise that people with sleeping Conscious can calculate 10,000 times faster. This means that we have a powerful computer in the Subconscious – much more sophisticated than our Conscious Computer. Since from acupuncture we know that all our organs are holographically represented on 5 different places (palms, feet, ears, tongue, and irises) and the sick organ can be treated with equal success on any of these representations, this means that all our organs are ruled and regulated on holographic principle.

Since holographic tri-dimensional images are created with laser light or laser waves, the holographic representation of all our organs on the body surface means that our organs are ruled and regulated with waves. Since hypnotized people with sleeping conscious could calculate 10,000 times faster, obviously in the Subconscious we have a powerful super-computer which works with waves – Quantum Computer, and this Quantum Computer rules and regulates all our organs with waves on the holographic principle [2]. I spent 40 years of my life first photographing the aura, and then I developed super-sensitive equipment, which allowed me to measure this weak electromagnetic field (EMF) – 1,000 times weaker than the EMF created by the biocurrents of the body. I found that this weak EMF is nonlinear (NEMF) and it rules and regulates everything in the body, not with its strength, but with the information it carries [2].

Then I found that our aura is emotional – it shines brighter when we experience positive emotions and it is dimmer when we experience negative emotions [3]. The Russian scientist Shkatov developed equipment that allows him to measure the spinning of the aura. He found that when we experience positive emotions our aura spins clockwise. Since vortices spin clockwise and suck energy

in, obviously positive emotions make our aura (which is NEMF) to spin clockwise and suck NEMF energy in. For this to happen, there should be a reservoir of NEMF energy available, and I reached the conclusion that Space Matrix must exist and it must be NEMF [4]. Space Matrix is the substance from which everything material was created. It makes sense this primary substance to be NEMF because being nonlinear this substance will not dissipate, and being NEMF it can imprint information. On this NEMF the Creator imprinted the information of what he wanted to create and the material world was created.

The Russian scientist Shkatov found with his patented equipment that when we experience negative emotions our aura spins counterclockwise. Since anti-vortices spin counterclockwise and emit energy, obviously negative emotions make our aura (which is NEMF) to spin counterclockwise and emit some of its NEMF energy to the Space Matrix NEMF [4]. Since when we experience positive emotions, we say we are in high Spirit, and when we experience negative emotions we say we are in low Spirit, I concluded that the aura must be our Spirit. Then I found that the advanced Jewish Cabala was teaching to high priest that the aura is our Spirit.

Thus, we are material body and Spirit (NEMF) and while our material body breathes air in and out to live, our emotional Spirit at positive emotions breathes NEMF energy in from the Space Matrix (which explains our feeling of high Spirit) and at negative emotions releases NEMF energy to the Space Matrix NEMF (which explains our feeling of low Spirit). I have book published explaining that the Creator scooped out rotationally some of the substance (NEMF) of the Space Matrix and created Black Holes of anti-matter, which created the whole material world, and the NEMF that separated the anti-matter of the Black Hole from the matter got imprinted on all material creations [5]. This made all material creations – a material body and NEMF.

All living beings (humans, animals, and plants) have a second emotional NEMF intertwined to the NEMF of their material body, and this second emotional NEMF makes all living beings emotional. Now, imagine a person with both these NEMFs measuring an electron, which has his own NEMF – of course there will be influence of the NEMFs of the person on the NEMF of the electron, which will make the outcome not certain or with

probability. This will make it impossible to know the coordinates and the impulse of the particle at the same time, which is known as uncertainty principle.

Why do we have uncertainty principle? It is because everything material is a material body and NEMF (which explains why every particle is a particle and wave at the same time) and our material body has two NEMFs - the NEMF of the material body and intertwined to it is the NEMF of the emotional Spirit. Thus, if we have troubles understanding why everything in quantum mechanics is with probability, it is because our science refused to acknowledge the obvious fact that we are a material body and emotional Spirit, which make us emotional [3]. Our science denies the existence of the Spirit because it is weak NEMF (too weak but not impossible to measure) and it is invisible for our eyes – it could be seen only with the eyes of the Mind, which is attribute to the Spirit. With the waves of the Spirit operates a Quantum Computer in the Subconscious and the Mind is result of the operation of this Quantum Computer.

Our science is also incapable to explain telepathy, which is a resonance of the Quantum Computers of two individuals [6]. Neither could our science explain clairvoyance, which is a quantum jump to the future, which allow to foresee the future or

quantum jump to the past, which allows to see the past, because only Quantum Computers, like the one in our Subconscious, could do such quantum jumps. Our science is also incapable to explain intuitive creativity and why the state of ecstasy or full intuitive creativity is taking place only after watering with a lot of emotions. It is because intuitive creativity is doing of the Quantum Computer, which operates with the waves of the emotional Spirit [3], [4]. All unexplained events become easily explained if we accepts the fact that we are a material body and emotional Spirit [6].
