

Terrestrial Projections of the Cosmic Environmental Connections

Denes Joo

Architect-Urbanist, Hungary

ABSTRACT

In order to prevent the global, regional or/and local ecological catastrophes, in the actual terrestrial evolutionary circumstances it's worth extending the researches of the **EEE Ecology/environment-Ecumeny/population-Economy/activity tri-interactional systems** from the global to the macro- and micro-cosmic level, based on the Hermetic interactional axioms „as up so down and as down so up”, „as inside so outside and as outside so inside”, „as earlier so later and as later so earlier”, and „as in micro so in macro and as in macro so in micro”. In **macro-direction**, limiting successive „Our Cosmic Environment”/ „Our Local Universe” from „Our Whole Universe” to „Our Galaxy Milky Way”, with „Our Photon-Belt” on the exterior end of its fifth/irregular „Orion-Arm”, along which Möbius-like toroidal belt is whirling solenoid-like the Sun – Twin-Sun – Moon system (the Helios – Eos/Hemera – Selena second wave of Titans in Hesiod's „Theogony”), results a multicomplex motion of the Earth (Gaia in „Theogony”) as component of the Solar System. In **micro-direction**, in the Whole Periodic System, extended from the actually recognized 118 elements to 558, respectively with the Etheron-Gluon-Quark as primary elements, result similar multicomplex vibrations between the extreme limits of the **Material World**. The functional-formal-structural elements of this cosmic environment appear in form of projections on the terrestrial and other planetary surfaces, as an open book of the Nature, this surface including not only the global geoid-like geometrical multilayered envelope, but the inner fractal-like structured coating/strata of the Earth (and of the Earth-like planets).

Received: November 20, 2022; **Accepted:** November 28, 2022; **Published:** November 30, 2022**Keywords:** Terrestrial Projections, Cosmic Environment, Energetic Effects, Optimization**Prelude**

First of all, to be complete the image referring to the world concept and view of life presented in my previous paper [1], in addition to the successive creation of the chemical elements on the Atomic-subatomic and the other cosmic octavic levels each from another, starting with the ETERNAL ETHERON (on this level ELECTRON) and continuing with the GLUON and QUARK intermediated by the BION, it is necessary to present the creation of the suitable ETHERON itself too from the corresponding LIGHT, namely from the ETHERIC BION/BIOPHOTON, in conformity with the mechanism sketched in (1). So on this cosmic level the FREE ETHERON – called ETHERIC/IOVITZU ETHERON after its discoverer, the eminent Romanian scientist Ioan IOVITZU Popescu – is created by the 5-storeyed ROTATING LIGHTWHEEL-SYSTEM composed by 48 ETHERIC BIONS/BIOPHOTONS, evolving in a toroidal form around the burning ETHERONIC SEED. In fact all the 15 kind BIONIC ELEMENTS within the Extended Whole Periodic System are BIOPHOTONS – thus LIGHT-PARTICLES – of different complexity, presented in [1] as axial components of this whole chemical system, of course in symmetrical arrangement.

The ingenious invention of IOVITZU that the „free space” between the atomic-subatomic formations – as etheronic products – is filled up with FREE ETHERONS, led to the conclusion that on each cosmic octavic level the whole etheronic stock created by the

LIGHT-PARTICLES in form of FREE ETHERONS will transform successively into the increasing series of the suitable chemical elements, except the TACHIONIC ETHERONS created by the transition from the DARK(NESS)-PARTICLES of the previous pentatonic cosmic levels, this transition to the new etheronic forms realizing through the horn-toroidal implosions [1], from the dextrogire ring-toroidal to a levogire spindle-toroidal swirling. # The expression ETHERON is included in [3] too, but without referring to its discoverer [2] and without answer to E. Duursma [4] for clarifying this question.

Description of the Known and Supposed Cosmic Environmental Connections

The Cosmic Structure of Our Local Universe: Based on the multimillennar-secular-decadal experience, the resulted cosmic model presented in [1,6,7] comprises the onion-like successive octavic levels within the neuron-network-like **Multiverse**, Universes like **Our Local Universe** composed by 3 galaxy-clusters/systems (Milky Way, Andromeda, Triangulum) with a „coffee-cup effect” arrangement (2,3), and thousands of galaxies, between them **Our Galaxy Milky Way** spiraling with four regular arms (Norma, Scutum/Crux, Sagittarius/Carina, Perseus) and a fifth irregular **Orion-Arm** ejaculated from the Galactic Core (through crossing with the regular arms creating the cosmic races in cycles of 31 million years), with a toroidal **Photon-Belt** at the top – similar with the above sketched rotating lightwheel (1), thus etheron-creator on astral level.

Our immediate cosmic region is structured around this Möbius-band-like 5-times twisted toroidal-hexagonal **PHOTON-BELT** marked by the six constellations/loadstars Lyra/Vega, Bootes/Arcturus, Leo/Regulus, Canis Major/Sirius, Taurus/Aldebaran, Andromeda/Sirrah (3) [7], tangent to the Lyra/Vega - Cepheus/Alderamin - Draco/Thuban 3-times twisted **Polar-Circle** at the Lyra/Vega, and intersects the 2-times twisted **Ecliptic/Zodiac** at the Leo/Regulus and Taurus/Aldebaran, respectively the once twisted DNA-like **Orion-Arm** at the Cygnus/Deneb and Canis Major/Sirius. At the intersection Orion-Arm – Ecliptic/Zodiac there are the **stargates Orion** (over the „hand” of Orion) and **Ophiucus** (over the „sting” of Scorpion), around which in every half Platonic/**Cosmic Year** ($25,920:2=12,960$, round 13 thousand terrestrial years) the sky will be getting in mirrored position, so alternating of the **Osiris** and **Sokaris periods**, one of the biggest secrets of the ancient Hermetic Order. Our **Solar-System** – the **SUN-GOD** (in Hesiod's Theogony **Helios**, together with **Selena**/Moon-God and **Eos/Hemera**/Twin-Sun-God forming the second wave of the Titans) – executes a solenoid-like motion on the surface of the huge toroidal **PHOTON-BELT**, every turning in 25,920 terrestrial years (the attending Hemera-cycle is 31,746 years), in sequences of $(7 \times 7 + 1 =)$ 50 turns (**Divine Year**, $50 \times 25,920 = 1,296,000$ years), total $6 \times 1,296,000 = 7,776,000$ years, a **Photon-Belt-Cycle**, 4 same cycles $(4 \times 7,776,000 = 31,104,000$ years) constituting the crossing-time between the Orion-Arm and the 4 regular arms of Our Galaxy **Milky-Way** (2). This toroidal surface/membrane – World of Luxons – is separating the infra- and supra-luminous domains: World of Tachions and World of Tardions. The inner **13D** photonic layer/World generates the other two Worlds, mediating between them, or inversely, it's a result of the interaction between these two extreme states. This process is present on the atomic level too, of course on the corresponding scale. The (auto)organizing of this grandiose process is conducted by the **SUN-GOD** (4) in form of **light-body**, (after every sequence Phoenix-like regenerating itself) forming a quantitatively and qualitatively increasing „team” of the **Creator Gods and Goddesses**, progressing along the **lightwheel-like 6 Photon-Belt sequences** (3, 4).

After the **first two phases** Lyra/Vega – Bootes/Arcturus – Leo/Regulus, during of which the Sun-God „managed” alone, the **third phase** Leo/Regulus – Canis Major/Sirius was guided by a „quaternionic team” of $2^2=4$ Gods, the Moon-God Babba respectively ancient time/Aeon and ancient space/Protogone, followed in the **fourth phase** Canis Major/Sirius – Taurus/Aldebaran by the „biquaternionic team” called **Enead/ $3^2=9$ Great Deities** (5), with a terrestrial projection marked by Egyptian pyramid complexes, called **Eneadland**, including the Sirius/Isis, Orion/Osiris, Hyades/Seth and Pleyades/Nephtis as result of the successive divine creation. The most known pyramid-complex is formed by the Orion-Belt-Pyramids, between which the Great Pyramid (6,7) with its complex gallery-system reflecting the whole cosmic evolution of the Dragon-Reptile-Paleomammal-Neomammal-Human cosmic races, including her (1 to 5 helical) genetic and nervous-system/brain-structure, in correlation with the evolution of Our Galaxy, Solar-System and Home-Earth (19). Other projections of these constellations are dispersed in many places, e.g. the Pyramid-Complex of **Visoko**, Bosnia-Herzegovina, the Hyades/„Head of Taurus” [6,8] – but probably the whole Taurus – realized after the 50,000 BC Deluge, and covered with alluvial deposits three-times (8). Less known is the **fifth phase** Taurus/Aldebaran – Andromeda/Sirrah with $4^2=16$ Gods, with the more representative projection of the Lyra constellation (Vega being the Atlas-Mountain) in **Africa**, home of the ancestral **Yoruba-culture** (9), other representations being in Central-America,

Easter-Island, Damanhur/Italy. In the actual cosmic period follows the change over to the $5^2=25$ Gods' Andromeda/Sirrah – Lyra/Vega **sixth phase**, through the Cygnus/Swan constellation, of which projection is the Ceahlau Peak (Delta Draconis) in the Eastern-Carpathians, Romania (8). The start of the actual Photon-Belt-Cycle (Myozen-Spring 6.5 My ago) after the formation of the Carpathians' inner volcanic range (15-9 My) is the last but one step in the terrestrial environmental evolution for the possibility of **human civilizations**, the last being the Danube Ice-period, after which – in the last millenium – succeeded the 5 really human (Hyperborean-Agartha-Maya-Atlantic-Arya) civilizations (14) [9]. Between two sinkings in the Pacific (Mu and Murror, 50,000-30,000 BC), the whole Eurasian continent – the Big Uigur Empire – formed a huge bird (9) with 2-2 wings (archangel quality) to North and South, beak to East (Korean peninsula), eye (Jewish Autonomous Region at the Amur-bend, Russia), maw (Asian Carpathians), legs (Arabia), bottom (European Carpathians), tail (Western Europe). Similar to this E-W mountain-chain/4-winged **Eurasian Bird**, exists the N-S mountain-chain/**American Dove** (J.J Hurtak's Enoch Keys). Referring to the dimensional evolution of the Earth, based on the Siriusian golden plates, in intergalactic context in the future results a progress to the 8. spiritual dimension.

The centre of this grandiose Local Cosmic System is the Nebula NGC 6543 „Cat's Eye”, the **Ecliptic North-Pole**, of which projection is the **Rosia Poieni Peak**, West-Carpathians, Romania (3,10,11,12), gravely affected by the mining exploitation, but with possibility to remedy the created catastrophic ecological situation through realization of a new city, after Paolo Soleri called „Archology” (Architecture+Ecology), and after the masterplan „Whole Periodic City”, based on the radial-spiral table of the Whole Periodic System [5,10] (24). Around this „cosmic navel”, projection of the **Ecliptic Axis** situated in the „stomach of the Dragon” is twisting the Draconic Vortex, of which terrestrial projection was/is situated within the ancestral „Asian Carpathians” and the actual, **European Carpathians**” (3,9,10,11,12). Other similar cosmic projection – of the **Galactic North-Pole** (GNP) in the constellation Coma Berenices – is situated near Budapest, by the Danube-bend, the **Pilis-Pomaz Plateau** (12).

The Complex Energy-grid of the Earth: Beyond the above mentioned four Hermetic interactional axioms (mediated by Archangel Michael), in context of the **7 functioning principles** (mentalism, correspondence, vibration, polarity/duality, rhythm, causation, gender), the Emerald Tablets refer to the keys to Hermes' **Geomancy** and **Somamancy**, thus to the 5-leveled Planetary Energy Grid in form of Light-Etheric-Astral-Mental-Causal Bodies [11]. After the several millenar Platonic and Pythagorean knowledge and practice of the **Planetary Grid/Geomancy**, in the 1960s this science was rediscovered by the Russian researchers-team N. **Goncharov** - V. **Morozov** - V. **Makarov** and I. **Sanderson**, and some years later revised and considered to be worthy of baptizing according to their own names, so it is known as **W. Becker** - **B. Hagens Planetary Grid** (18).

The original discovery refers to the recognition of the dodecahedral-icosahedral crystalline structure of the Earth, but later it was completed/detailed with many other elements. The spheroid-shaped planet with this grid composed by superposed **12 pentagons** and **20 triangles** on its surface, thus 62 intersection points including the 2 Poles (18,19), in fact is a central started fractal-like structured interpenetrating conoidal dodecahedral-icosahedral mixture, finally decomposable in 120 unicentral tetrahedra. Taking into consideration this joining of the tetrahedra (the possibilities vertex to vertex, edge to edge, face to face),

the energy concentration is the maximal possible. Between the 5 Platonic solids – as **etheric pattern** – the **dodecahedron** is the basic phase of the Fulleren-series resulted in intercalation of hexagons/hexons between the 12 basic pentagons/pentons (called C20), the first same Fulleren being the C60, called Buckyball or Buckminsterfulleren [1]. These formations with more and more intercalated hexon-serie are virus-patterns too, after the recognition of the eminent discoverer-architect R. Buckminster Fuller in 1954. The other triangular based Platonic solids –the **icosahedron** (water-pattern) and **tetrahedron** (fire-pattern) take part too of the **Planetary Grid System**. The triangle- and square-based solid called **octahedron** (air-pattern) constitutes the well-known **Pyramid-form**, remarking that the supraterran built half of the pyramid functions energetically as a whole octahedron (7). The **square-based cube** (earth-pattern) is realizing its own energetic grid in form of the rectangular matrix of the Earth, called **Hartmann-system** after the publisher (1947), being constituted by the intercalated energy-walls and their intersection points/columns of the incoming (benefic, much liked by the dog) and by the inner core reflected outcoming (malevolent, much liked by the cat) cosmic ray bundles. This micro-grid itself is modulated after the Golden Ratio with smaller and larger distances compared to the usually 2.5-3.0 m (increasing from the Equator to the Poles) between the walls – except the underground anomalies e.g. water, caolin lence, which can disperse these rays – and take part of the rectangular macro-grid, on which is based the whole mapping system of the Earth. Similarly to this rectangular grid-system is known the **Dragon-lines system** with its some shorter and very winding lines, reflecting a some 30% smaller Earth-surface and very agitated moving before being destroyed, but later continuing and extending this pattern [12]. The longitudinal and parallel **Dragon-lines** form 3 piling up nodes of a large triangle with the vertexes **Damanhur**/Montblank, **Kaylas**/Himalaya, **Drakensberg**/South Afrika huge mountain-pyramids, the intersection point of the bisectors being in the point 21 (20).

Considering the Hermetic **Geomancy** and **Somamancy** two virtual poles of the cosmic Ecology/environment – Ecumeny/population – Economy/activity 3-interactive system, there exists a strong connection/entanglement between the structure and functioning of the apparently formal different Whole Cosmic, Terrestrial and Human domains, at least in the light of the proposed **Dynamic Dual (DD) Cosmic Evolutionary Model** [13,14,15] and of the ideas referring to the well-known and supposed cosmic, planetary and human elements, based especially on the **ETHERONIC THEORY** crystallized in the last decades [2,1,4,5,16,17].

It is generally accepted that the **7 human chakras are rotating lightwheels**. The **cosmic rotating lightwheels** are **etheron-generators**, such **cosmic chakras** on the **7 cosmic octavic levels**. In conformity with, within the cyclic cosmic evolution each octavic level is starting with a suitable **ETHERON KIND** created by its rotating lightwheel, the so born free etherons transforming successively into chemical elements, passing the whole level [9]. Contrary to the **7 LIGHT-periods-wheels/chakras-etheron kinds-nucleonic structured octavic levels**, within the **WHOLE COSMOS** it exist **5 DARK-periods-wheels/chakras-etheron kinds-pentatonic structured levels too**. Similarly in terrestrial context, the 12 nodes system of the Planetary Grid is composed by **7 LIGHT-wheels/chakras** (16 Hawaii, 20 Algeria, 12 Karachi/Pakistan, 47 Easter Island, 45 Loyalty Islands, 43 Wharton Basin, 49 Rio de Janeiro) and **5 DARK-wheels/chakras** (18 Bermuda/USA, 14 Dragon/Japan, 41 Drakensberg/South Africa, and the two Poles 61, 62), 1 Gizah/Egypt corresponding to the Big Implosion Point between the Dark and Light phases of the cosmic evolution

[1]. In human context, beyond the well-known **7 Light-wheel** chakras there exist **5 Dark-wheel** chakras with a transition point within the draconic brain (19) by the big-headed humans.

Another less known discovery of the Gontharov-Morozov-Makarov Russian researchers-team refer to the Atlantic (around the watered splitting surface) and Pacific (around the dry spherical calotte) **large energy-circles** surrounding the Earth between the well-known Planetary Energy Grid, but independent of it (21), connected to the former stage of the expanding **Earth** after the splitting of the **Tiamat** by the **Nibiru**, separating the former planet **Luna**, which later was shattered, its core being captured by the **Earth** forming our actual **Moon**, and the debris of the outer part dispersed in the space, forming the actual **Asteroid Belt**. Long time after the splitting, both new planets Earth and Luna received back their spherical form and the above presented planetary grid distribution, continuing to expand, of course the former planet Luna only till its breaking into pieces. In this context, after the splitting the tectonic plates was formed around the splitting surface, the actual **Pacific Ocean**. This surface is surrounded by the **Fire-Belt** too, partially modified by the continental movements. On the expanding Earth surface, both energetical circles mark the duplicating of the circumference of the splitted circular surface/spherical calotte, moved independently from the planetary grid, but the splitting of the continental plates is along the main grid-lines (18,19,20), maybe not influenced by the **4 swings** and gyroscope-like slow back-wanderings of the Earth's axis in periods of 31 million years, caused by the crossing of the **Photon Belt** – with the Solar system and the Earth in it – with the 4 galactic regular arms, 31.1-62.2-93.3-124.4 million years ago (2), the last steps within the repeating cyclic creating process of the **cosmic races** dragon-reptile-mammal [6].

Geophysical and Pyramidal Terrestrial Projections: Along the agitated history of the Earth [9] (13,15,16) – first as part of the giant planet Tiamat situated on the place of the actual Jupiter – after the splitting evolving independent, on its expanding surface are recorded all the cosmic events and connections, being necessary only their recognition/interpretation [9]. From the above mentioned marks/traces are remarkable the **mappings of the constellations**, first of all the **projection of the Constellation Draco/Dragon** (3), before the Equator-change around 500-480 Million years ago in form of **Asian Carpathians** (9), respectively after this change in form of **European Carpathians** (10,11,12) in 2 phases: between 250-200 M years the outer plicated chain, and between 15-9 My the inner volcanic chain with many mountain-pyramids [6,7] (10). the projections of the Galactic and Ecliptic North Poles (12) and of the Constellation Cygnus/Swan (8), the Ursa Minor included in (10,11), Orion and Aquila (12), respectively of the giant **Light-Pyramid** within the Carpathian Vortex marked in its corners by the „White Castles” Alba Iulia, Belgrad, Székesfehérvár and Záhony (12), four of the seven ones, the other three being Jerusalem, Rome and Biograd/Croatia, the centres of the latest **Hemeris Big Octave's** 7 sequences of 31,746 years (=222,222, the Annunaki period, the earlier being Nephilim 444,444 and Elohim 666,666 years ago (14)). The mountain-pyramids (10) as projections of the main stars of the Constellation Draco are cut off, and many others annihilated, really completely destroyed, probably within the **32,600 BC** colossal cosmic catastrophe extending almost over the whole Photon-Belt, but at least over the Solar-System and the constellations from Leo to Taurus, inclusive the Nibiru. However, the most problematic implications are the modifications of the whole projection itself, with the transformation of the lake-system into the actual Mediterranean Area, with the Gibraltar-strait to West and Bosphorus/**Bas-Boreus**-strait to East, to the Black-Sea,

cutting in this way the tail of the **Boreus/Dragon invictus**, namely mutilating the whole projection, and that of the Ursa Minor's, refashioning the Balcanic Mountains and the whole territory called **Drakya**, thus the projection of the **constellation Draco (11)**.

Within the Table (15) this catastrophic date means the end of the Nibiruan domination from 273,800 BC on the Earth (total 241,200 terrestrial years=67 Sars/Nibiru cycles of 3,600 years, 8 female governors with leading centres/capital stepped pyramids near the mining exploitation in the Carpathians and for processing and expedition in Sumer, in 220,000 BC end of the Elohim, transition from the Nephilim to the Annunaki (15), contrary to Z. Sitchin's confuse interpretation), respectively in the Table (16,17) the finishing of the veritable pyramid creations by Adam/Menes/Kheops, Seeth/Khefren, Enos/ Djosser and Khenan/Megherin within the mapping program of the **Eneadland**, and realizing of weaker projections of the **Constellation Taurus**, e.g. the pyramid complex at **Visoko [6] (8)**. The well-known **Kheops-pyramid** realized shortly after the Big Deluge 49,300 BC (first sinking of Mu(kulia), Ma(durai) and Atl(antis), the sincro swimming of the 3 whales, creation of the Big Uigur Empire on the Eurasian continent), with a chimney-like **Djed-column inside**, reflects the complex cosmic connections of the Earth (6,7), at least within the **4D-5D**.

Beyond the **tetrahedrons** as basic cells of the **3D** continuum, the **octahedral pyramids** as intersections of two **tetrahedral pyramids** being the basic cells of the 4D continuum, their realization/insertion as **4D cells into the 3D space** is a meaningful part of the **Divine Dimensional Cosmic Evolution**, of which next step is the creation of **5D cells**, like the „Infinite Column” of C. Brancusi, the sharpness of the pyramids being in correlation with the geographical position on the surface of the holder planet in congruently relations (7). The really functioning pyramids can realize astral and universal communications, usually between same dimensional cells, but with the possibility of interdimensional ones too, and what is more interbreedings with very/infinite long life. The dimensional increase is a vibration growing question in correlation with the self-frequency of some system.

Optimization Possibilities within the Terrestrial Evolution:

Detailing the above mentioned evolutionary possibilities, in the interest of a more better harmonizing of the ecological-ecumenical-economical conditions, it's worth to accentuate first of all the whole global organizing, and within it the re-organizing of the wrongly functioning components as territories or domains, e.g. the dying Europe (23) only not in form of Reid's [20] **USE** (United States of Europe), but **ESU** (European State Unions), with organizing of the Central European Territory based on cosmic principles and harmonic oscillator-like functioning – or the actual inadequate energy supply, as a consequence of the lack of a global consciousness caused by its generally low level, with very differentiated evolutionary stage of the terrestrial inhabitants and different intruders.

Based on the Hermetic axiomes and principles, the ancient civilizations functioned after cosmic structuring regulations, namely using the **3x2** „coffee-cup effect”-like structured Universe model (2) combined with the duality or octavic biquaternionic model (2,3), thus exactly the above presented **rotating lightwheel model (1)**, called „**Gobe-Szekler**”. The terrestrial **3 Big Areas**, each with North and South part, so **6 Continental Areas** (Europe-Africa, Asia-Oceania, North and South America) – contrary to the demographic differentiations – can be the components of a 3x2x4 or 3x2x5 or 3x2x6 global model [18]. The detailing proposal of the 3x2x5 model referring to the reorganizing of the Old-New Europe [23] based on cosmic principles makes possible the harmonic oscillator-like functioning on long time, of course being more advantageous the Europe-Asia separating at the 700 longitude through Samarkand [9], with equilibrated functioning possibility of the whole terrestrial system, maybe including all supra- and inner-terrestrial inhabitants.

Conclusions: Based on the above considerations, extending the notion of „**environment**” from the terrestrial to the cosmic level, a larger vision is possible in understanding and solving the problems, alike on short and long term, with more efficiency. Knowing the cosmic connections, it's possible to predict future terrestrial events, and vice versa, some terrestrial phenomena can call our attention to the ensuing cosmic events, or can explain former events. Our ancestors lived together „with the stars”, and with the Sun-God, they could „read all from the sky”. The spiritual evolution to the possible **8D** of the terrestrial humanity means to come back to this spiritual/divine thinking.

Really it's a long way from CHEMI!

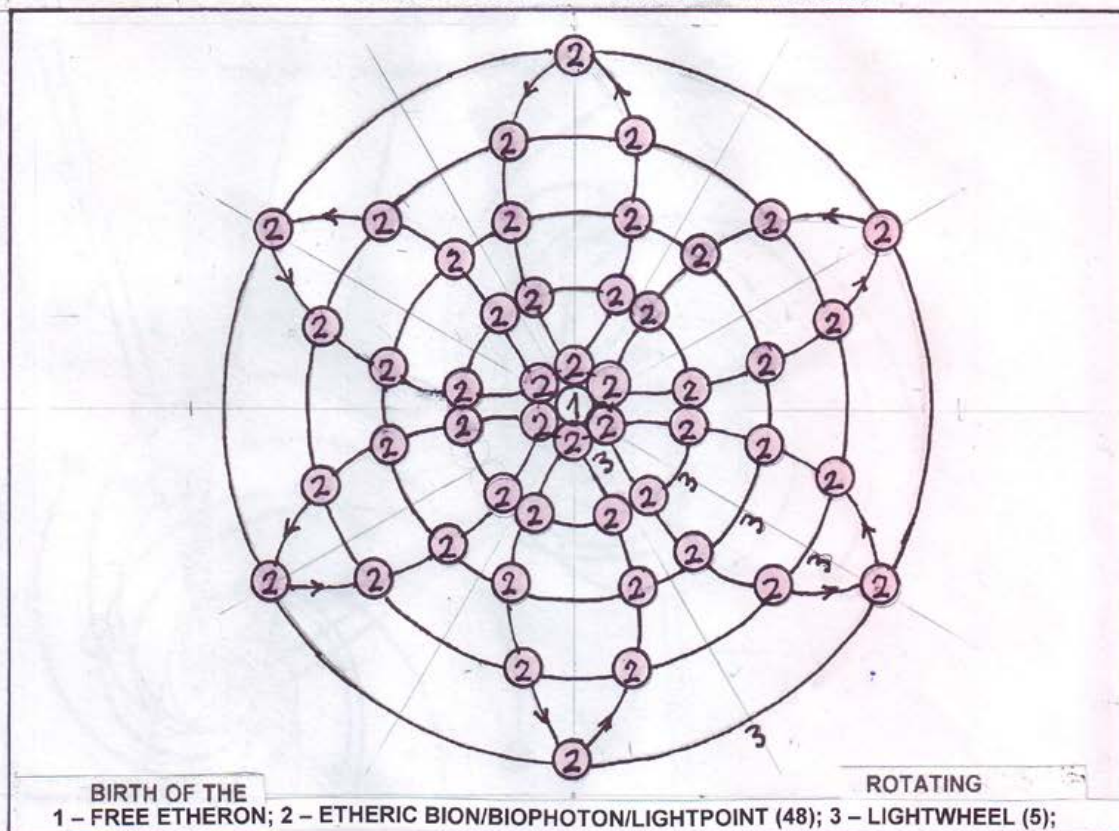

List of the annexes: 22 drawings, 2 tables.

The BIONIC STRUCTURED EARTH consists by a back-dented CORE/hollow Earth/ central peaked polyhedral (20 tetrahedral, 12 pentagonal, 360² octogonal, and other polygonal) PYRAMIDS, with their outer mirrored TWIN-PYRAMIDS together, of which peaks form a Le Sage/Jean-Marie Lehn/Fulleren-like spherical CAGE/CHRIST-GRID.

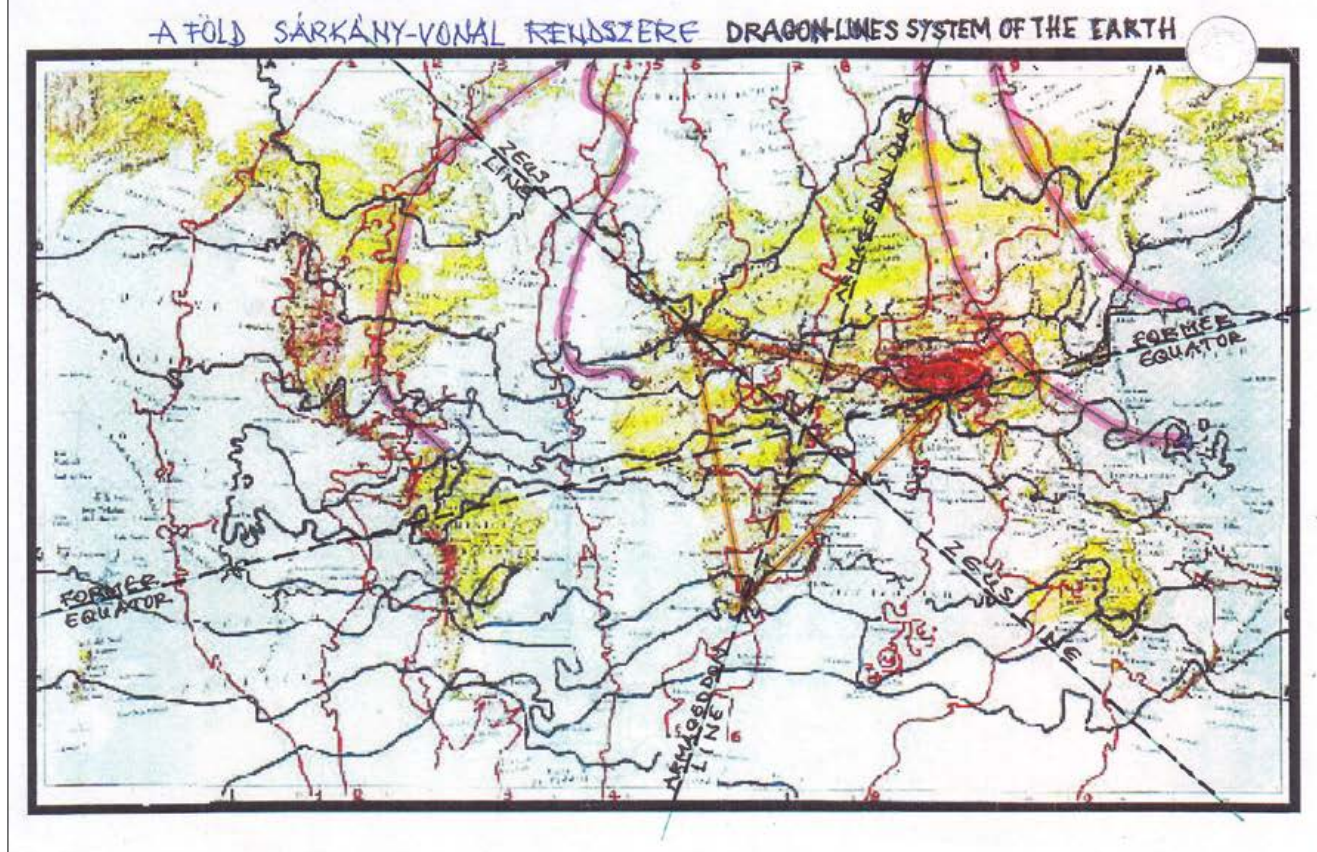

(E. v. DANIKEN: PROPHET OF THE PAST)

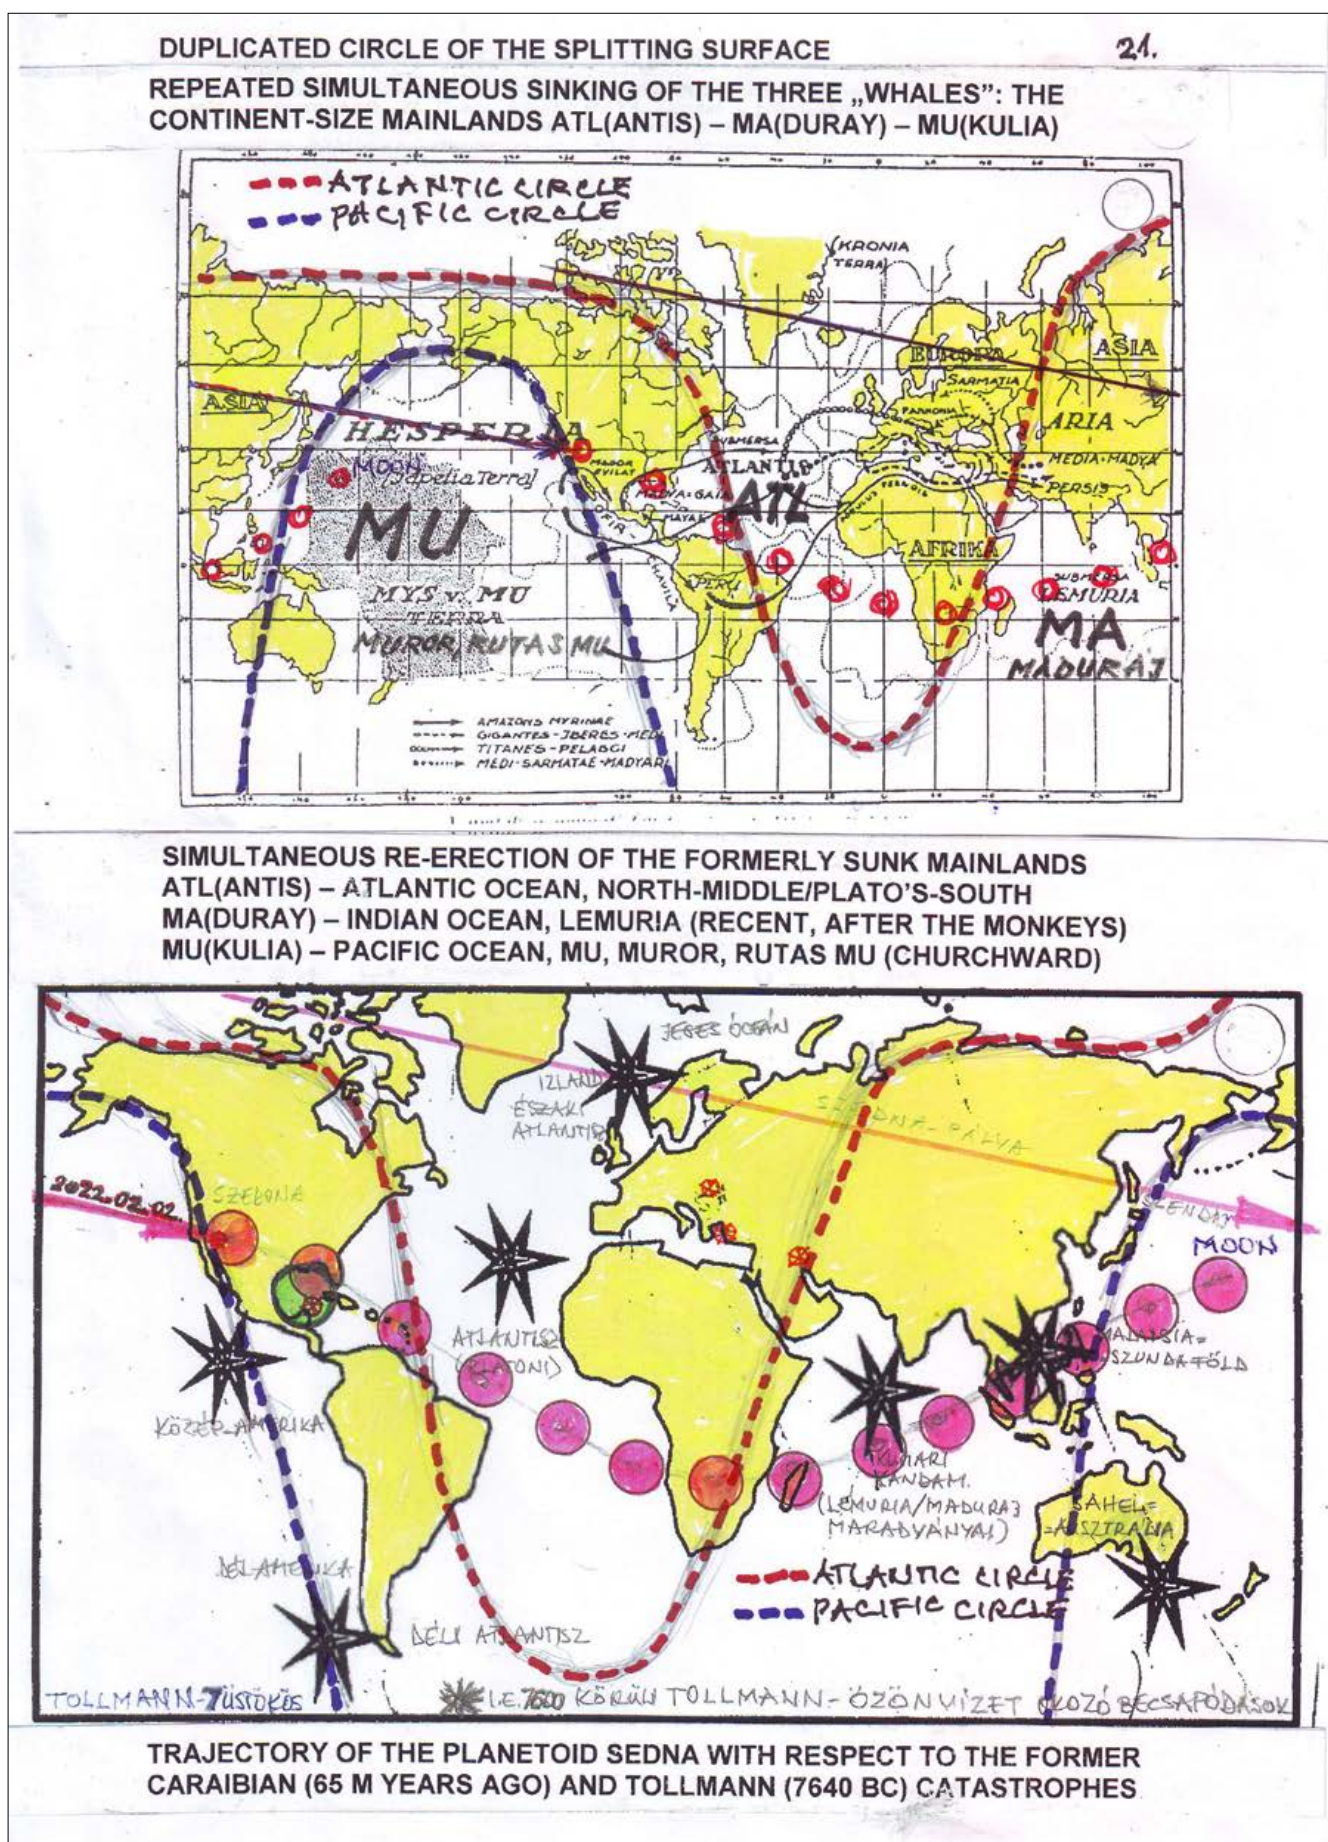

THE DRAGON-LINES SYSTEM WAS FORMED 500 MILLION YEARS AGO, AT THE CHANGE OF THE EARTH-EQUATOR, THE FORMER POLES BEING THE HIMALAYA AND THE MACHU PICHU. AFTER THIS CHANGE THE EARTH IS EXPANDED 30%, THE EQUATORIAL AND POLAR LINES REFLECT ALL THE CHANGES, INCLUDING THE LARGE-SCALE POLE-SHIFTS (31 MILL. YEARS).

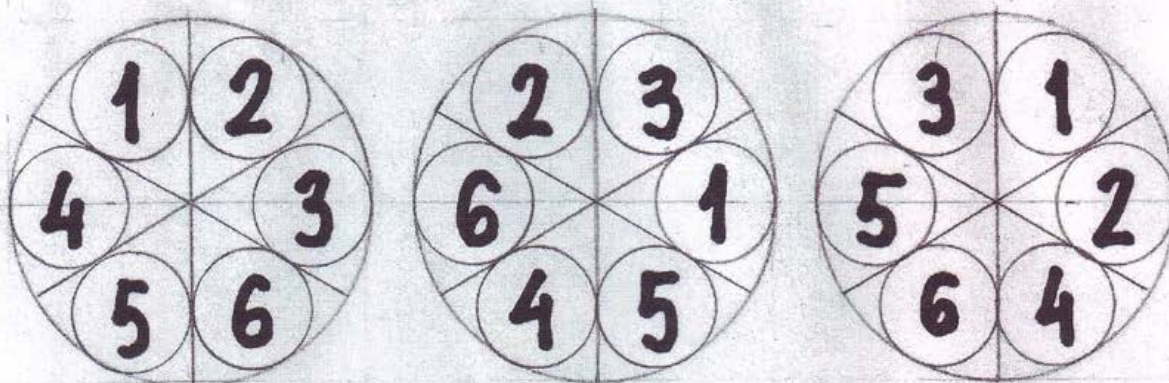

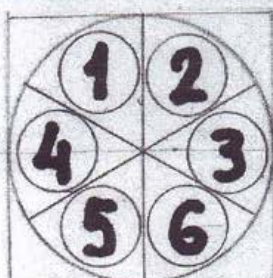

TERRESTRIAL SELF-GOVERNING POSSIBLE VARIANTS

22.

SIMILARLY TO THE ANCIENT GOBE-SZEKLER ORGANIZING STRUCTURE, ON THE EARTH EXIST THREE CONTINENT-PAIRS (GENERA) SITUATED ON THE NORTHERN AND SOUTHERN HEMISPHERES (FUNCTIONS), THE SIX MAIN CONTINENTS (TRIBES) CORRESPOND TO THE ANCIENT ORGANIZING MODEL 1=EUROPE; 2=ASIA; 3=N-AMERICA; 4=S-AMERICA; 5=AUSTRALIA; 6=AFRICA.

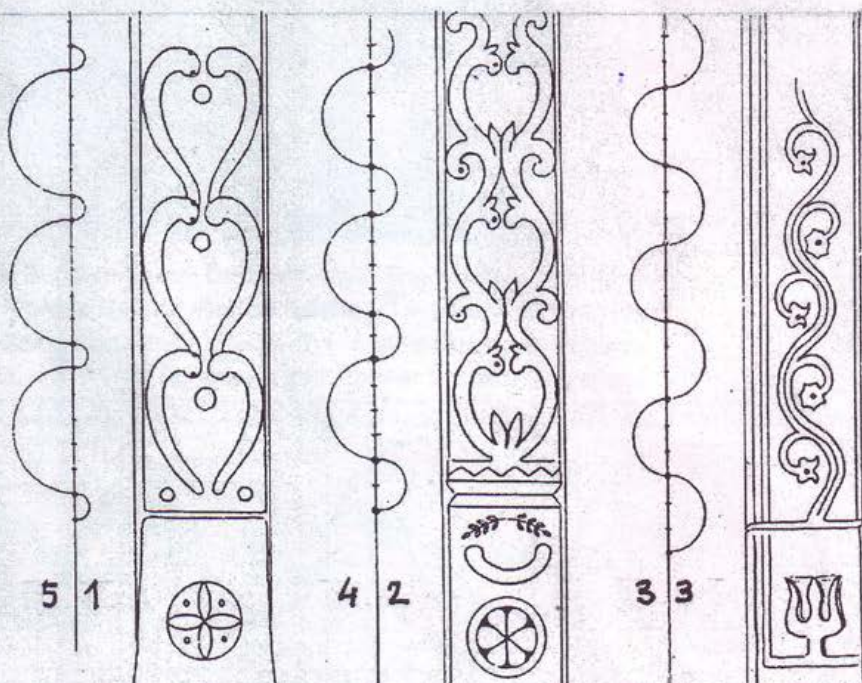

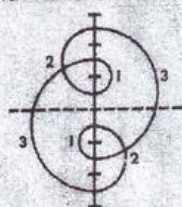

GOBE-SZEKLER ORGANIZING

INVERSION-REFLECTION

MILITARY-CIVILIAN

SZEKLER TRIBES: SYMBOLIC NUMBER:

JENŐ - HALOM

1 6

ADORJÁN - ÁBRÁN

3 4

ÖRLÖCZ - MEGGYES

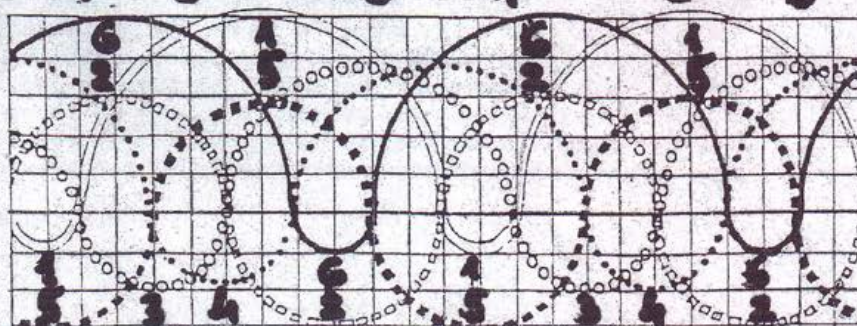

2 5

GOBE-SZEKLER HERALDIC SYMBOLS

MILITARY-CIVILIAN

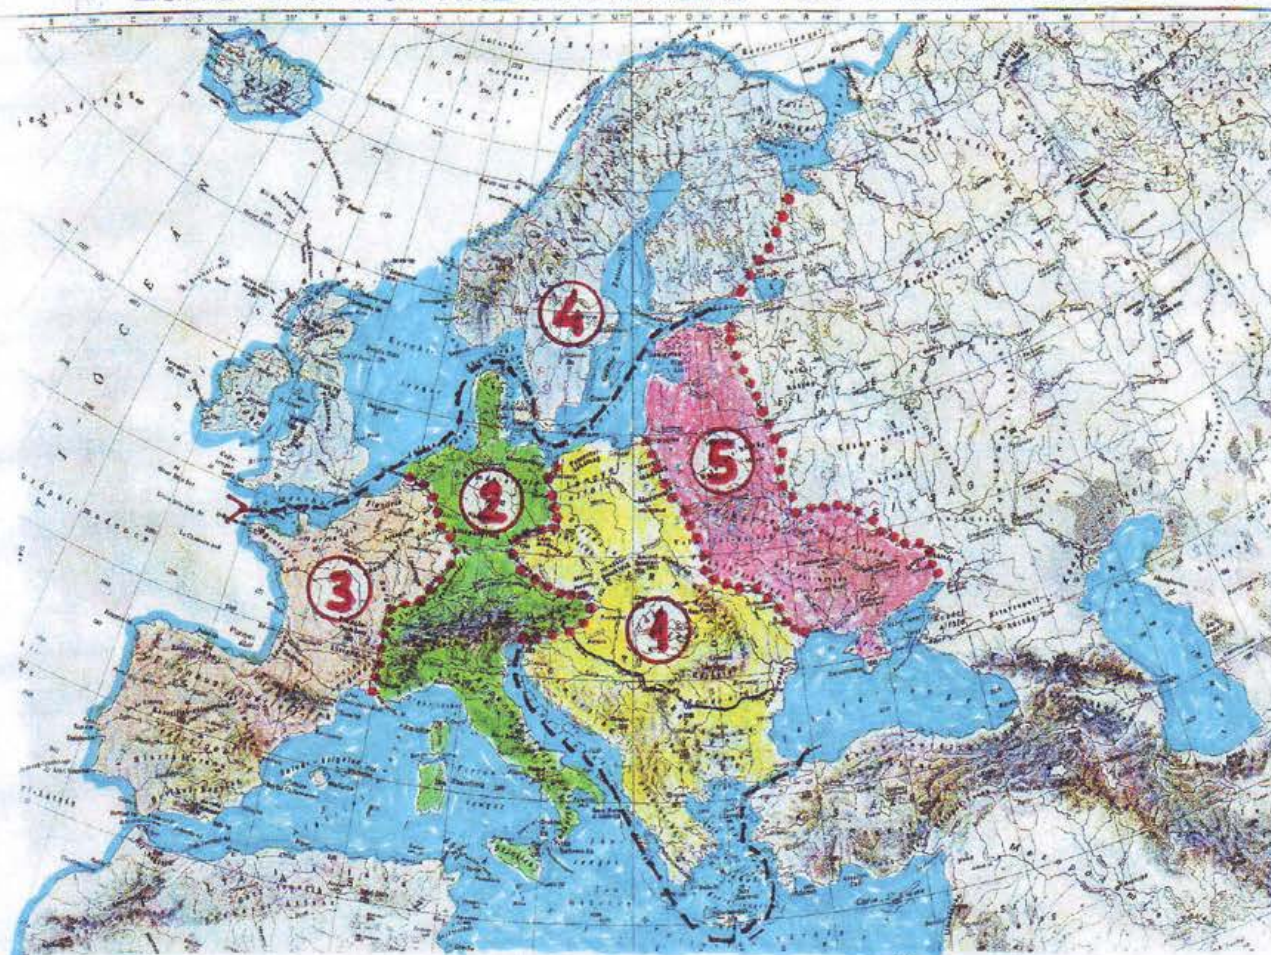

1-1 SUN - HELIOS
2-2 STAR - HEMERA
3-3 MOON - SELENA

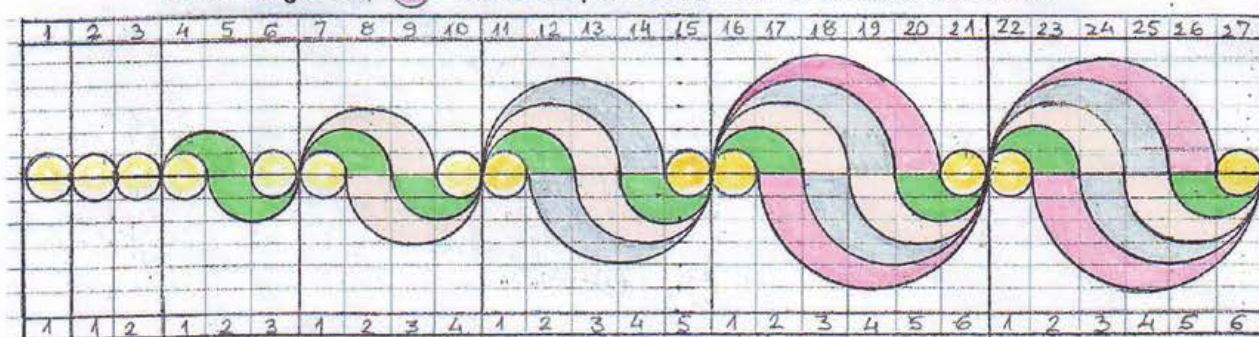

EUROPEAN CONTINENTAL AREAS' FUNCTIONING MODEL

23.

- ① – Central-East European Area: Drakya=Dakya+Trakya; ② – Central-West European Area: Former German-Roman Empire; ③ – West-European Area: Former Franch-Iberic Kingdoms; ④ – North-European Area: Skandinave-British Kingdoms; ⑤ – East-European Area: Former Socialist Countries.

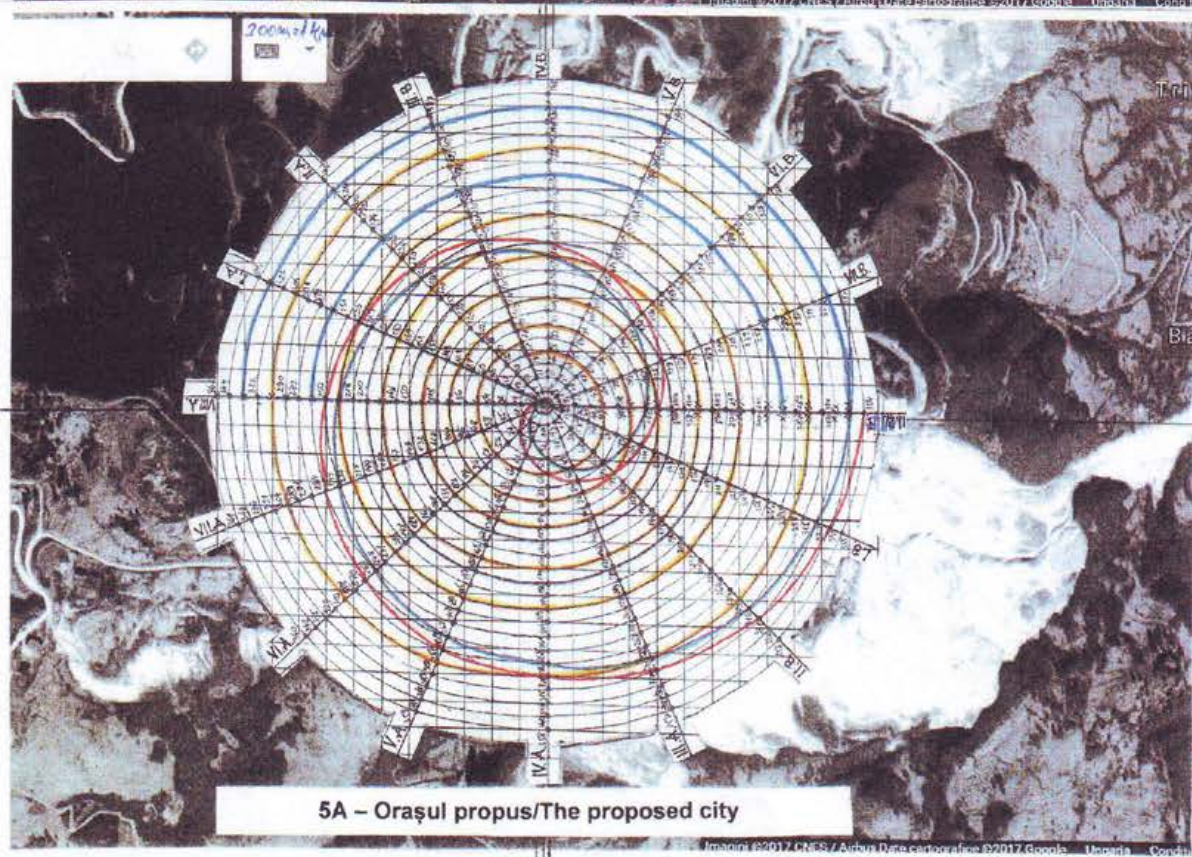

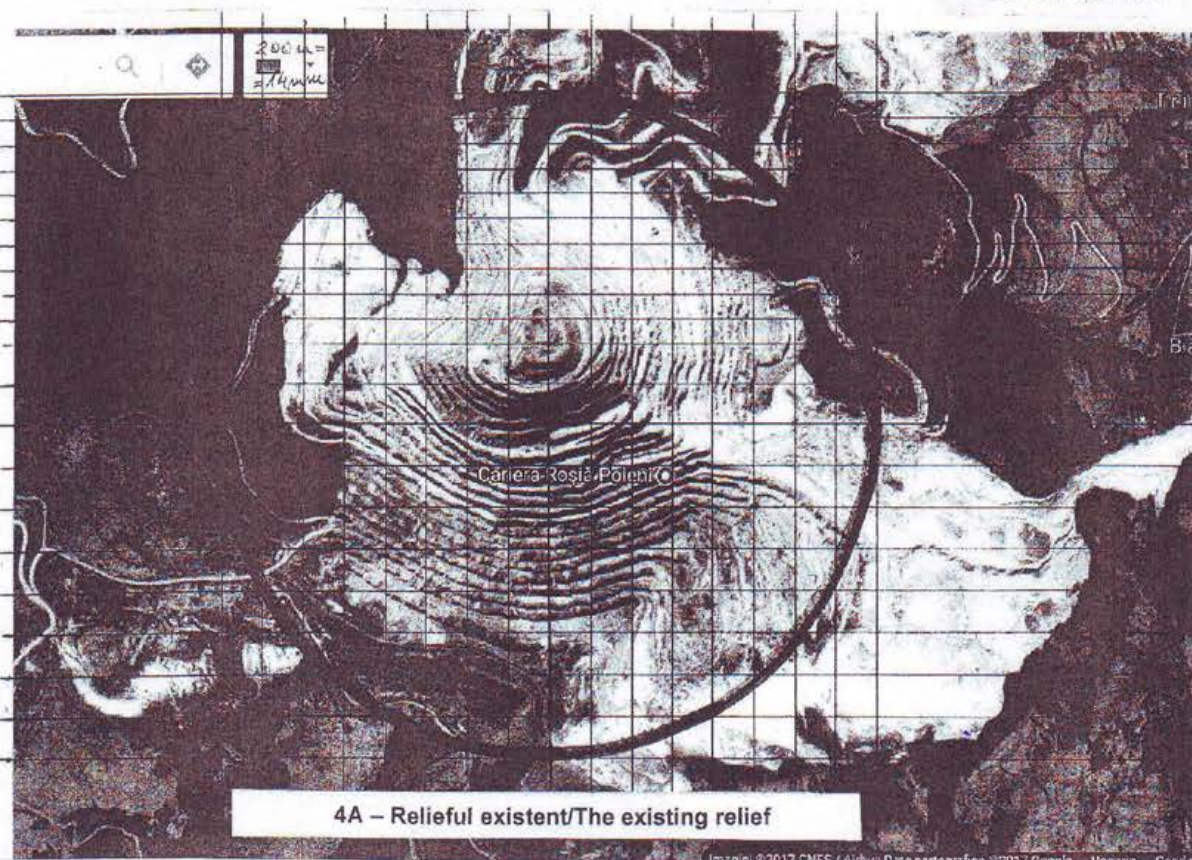

About Author: Dénes JOÓ, after the „Ion Mincu” University of Architecture and Urbanism in Bucharest, he studied Mathematics, Economy, Sociology in Cluj-Napoca-city, and Postgradual Settlement and Regional Planning in Bucharest, and parallel with all these Physics, Chemistry, History, Astronomy, Philosophy and other scientific disciplines without limits (and titles). Elaborating new mathematical prognosis models, he extended the **Futures-Research** to the **Systemic Evolutions Research**, as a new synthesis in the science, extending it from the terrestrial to the cosmic evolution, from the micro- to the macro-world, including the **pyramids research**. The results are reflected in the extended **Whole Periodic System** (denesjoo.wordpress.com) and other studies.

Budapest, 15th February 2018.

THE ECLIPTIC NORTH-POLE IN THE WEST-CARPATHIANS
