The family, which initiates the education of its child in the mother's arms, gives its child to the teachers in kindergarten with good or bad information according to their education. The boy who idolized his parents at first is now facing a new person. If you have not completed your personal development and immature; If it's not in the hands of a teacher full of child love, but someone who does his job just for money, woe betide our little baby.

Our child, who looks into his teacher's eye with his radiant eyes, either loses his self-confidence or begins to grow rebelliously at the hands of a teacher who seeks mistakes, excludes him for his mistakes and despises him. He holds a grudge against life and all people, or he always stands in his way. As a child who is despised to be an impersonal individual because of his teacher, free from moral decency, soft temperament and justice, he is thrown into the middle of life after college if he can go to elementary school, middle school and high school.

However, man is a mirror of man. This society will never recover as long as there are narrow-minded, bigoted teachers who don't know how to respond the way they're treated. From human love; "Tolerate what is created," and teachers who do not guide themselves affect society negatively.

Our children should be educated without corrupting our traditions with the spiritual maturity of people, and without pushing the student's intelligence level, spiritual values, integrity and honesty into the background.

The point today is deplorable. What do we see when we look at the teachers I tried to describe in the upper paragraph who graduated from the school they attended and came to certain positions; They're at the extreme end of moral corruption. No one, my son,

has ever said be fair, never lie, humiliate or humiliate anyone. We were too blinded to see how much of a hand was at this point.

I think we need to start with the teachers before society can get better. How's that?

Candidates who can form a special connection with their student should be preferred so that the teaching and learning process can be effective.

Field knowledge, general culture and teaching professional knowledge should be sufficient so that they can analyze the attitudes and behaviors of their students well. According to him, he can be a teacher who can develop attitudes and behaviors, be full of love, respect, analyze individual differences between students.

According to the level of consciousness of the student family, it can make them realize their own mistakes by creating a consciousness in them without making the family feel their behavior, which is considered perfectly normal (violence, punishment, etc.).

The child raised in the hands of successful teachers should be able to compete with his peers in other countries so that our tomorrows can be better.
