The Mathematical Four Process Intelligence Elixir game tool is a very enjoyable mathematical Four Processing Game that parents can always play with their children.

It consists of 32 different conifers to perform 4 separate groups (Addition, Extraction, Multiplication and Division) Operations. By playing games with the game tool, it allows you to learn four operations and makes learning fun. Let your children, the elixir of intelligence, have free fun in the game, learn while having fun, open the unopened windows in your imagination. You know, playing games is the best way to learn.

Playing with the Intelligence Elixir game tool of the Mathematical Four Processes and exhausting the brain is the perfect brain exercise. It provides our visual memorization and fast detection. It is a gaming tool designed for Alzheimer's patients and the child to spend quality time with their friends, teacher, parents and learn the Mathematical Four Procedures by having fun.

By playing games with the game tool, it allows you to learn four operations and makes learning fun. Because, you know, playing games is the best way to learn.

Everyone from 7 to 77 learns to solve four business-related Processing Problems by sharing and talking to each other confidently using these tools.

When using the rope on the cone leaf to perform mathematical processing, it provides hand-eye coordination while increasing psychomotor self-control skills, since the brain has to work differently.

To practice in the mind by collecting, subtracting, multiplying and dividing, independent thinking and showing on the cone; With the Mathematical Four Process Intelligence Elixir game, they both contribute to their personal development and improve their brains and increase their personal development.

Working with this game tool, making learning fun by playing the more permanent game, both to work the right lobe of the left brain and for him, these tools improve analytical sensing, strategic thinking, problem solving skills, intuitive and creative thinking skills.

Everyone from 7 to 77 sees that when they see the answer in the back of the vehicle, with the key of the rope at the end of the process, allowing the actions to overlap, they can experience the joy of success when they pull the rope correctly, and they are proud of themselves.

Benefits of Conifer Mathematical Four Processes' Intelligence Elixir products

- The first stage of mathematics; Mathematical Four Processes are fun to learn.
- It is not an electronic product that dulls the hand-eye coordination of the person. The person's hand-eye coordination increases and their cognitive skills develop rapidly.
- Parents learn mathematics with their children, which are the first stages of four procedures, by having fun.
- When he learns the four procedures that are the alphabet of mathematics, which is a universal language, he speaks the same language as the children of the world.
- Contributes to the development of logical thinking. In this way, he easily solves the problems he will face due to the development of his reasoning ability.
- Contributes to the development of the thinking, memory and language part of the brain.
- Improves the ability to learn new information or remember previously learned information.
- Improves the carrying out of functions and activities such as planning, organization, attention gathering, grasping the bottom of the view.

What is Alzheimer's?

Alzheimer's disease is a progressive way to develop into a brain disease that causes impaired cognitive abilities.

This disease, which usually begins insidiously, occurs with memory impairment, forgetfulness, difficulty in performing daily activities and visual perception disorder.

There are serious deficiencies in mental functions, memory, judgment, perception and abstract thinking.

How can we Protect Ourselves from Alzheimer's Disease?

By eating well with organic products. Just like our bodies are supposed to work in our minds.

By playing games that make the brain exercise. For example: KOZALAK With games such as Mathematical Four Process Intelligence Elixir game, Chess, Sudoku, Checkers, Puzzles, jigsaw puzzle games.

Playing games with our parents and spending quality time. Socializing, reading books, watching television, going to the theatre, our mental activities protect us from Alzheimer's disease.
